Join us on May 22nd at the DoubleTree in Rockland, MA, for an informative and engaging evening designed to support your professional growth and continued education. This event offers a unique opportunity to connect with industry peers and expand your knowledge in a welcoming and productive setting. Dinner will be provided for all attendees.

2 Lectures
2 CE Credits

Thursday, May 22nd

Sign in begins at 5:30 PM, event starts at 6:00 PM

DoubleTree by Hilton 929 Hingham St Rockland, MA

Lecture: Diagnosis and Management of Maxillomandibular Lesions

This lecture covers common lesions of the maxilla and mandible, focusing on recognition, differentiation between benign and serious conditions, and appropriate diagnostic and management steps. Topics include clinical examination, key radiographic findings, and guidelines for monitoring, referral, or intervention. Practical case examples will help attendees confidently identify and manage these conditions in a general practice setting.

Objectives

- Identify common maxillomandibular lesions
- Differentiate between benign and concerning lesions
- Interpret basic radiographic findings
- Determine when to refer a specialist
- Understand treatment options
- Improve patient communication

Speaker: Dr. Daniel Oreadi

Dr. Daniel Oreadi, Oral & Maxillofacial Surgeon
Associate Professor Tufts University School of Dental Medicine (TUSDM)

Dr. Daniel Oreadi earned his dental degree from the Universidad Central of Venezuela and completed the Advanced Graduate Education in Oral and Maxillofacial Surgery at TUSDM. He then completed a fellowship in Oncologic and Reconstructive Surgery at the University of Tennessee Medical Center. Dr. Oreadi is an Associate Professor in Oral and Maxillofacial Surgery at TUSDM, a staff member at Tufts Medical Center with operating room privileges, and an associate at Bayside Oral & Facial Surgery in Seekonk, MA. He is recognized for his expertise in oral and maxillofacial pathology and reconstruction, having authored several articles and book chapters. Dr. Oreadi is also a reviewer for the Journal of OMFS's pathology and reconstruction section.

Lecture: Oral Malignancies and Mimics

It is critical for clinicians to be able to appropriately distinguish benign from malignant oral diseases, but even the most frequently seen conditions in oral pathology may be diagnostically challenging for clinicians who do not encounter them regularly. This presentation will help in the identification of both common innocuous and the more clinically significant lesions, including atypical presentations that vary from classic textbook pictures.

Objectives

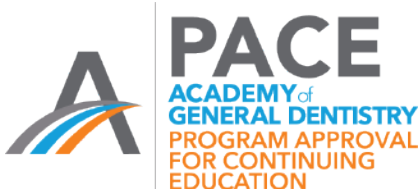

- Distinguish benign/reactive oral lesions from malignant/pre-malignant oral lesions
- Determine when to refer a specialist or manage locally with immune-suppressive medications
- Select appropriate diagnostic techniques
- Formulate differential diagnosis based on clinical presentation

Speaker: Dr. Mark Lerman

Dr. Mark Lerman, Professor, Chair, Diagnostic Sciences – Oral & Maxillofacial Pathology, Tufts University School of Dental Medicine

Dr. Mark Lerman is an oral and maxillofacial pathologist, Professor, and Chair of the Department of Diagnostic Sciences at Tufts University School of Dental Medicine, where he also practices diagnostic histopathology. He earned his B.A. in History and D.M.D. from Tufts, completed a general practice residency at Brigham and Women's Hospital, and trained in oral and maxillofacial pathology at New York Hospital Medical Center of Queens. After eight years on the faculty at Harvard School of Dental Medicine, he returned to Tufts in 2014. A Diplomate of the American Board of Oral and Maxillofacial Pathology and a Fellow of the American Academy of Oral and Maxillofacial Pathology, Dr. Lerman has authored multiple peer-reviewed articles and served as Secretary-Treasurer of the Academy.

We are certified by PACE Academy of General Dentistry. Participants who register and attend this event will receive 2 CE Credits.
